---

2013nbsp;0183;32;For your new business, you need a bank account. A bank account is the place you park your money and, usually, it will belong to your business. Some of the most common questions and things that a small business owner needs to know about business banking. There's a lot to consider when opening a business bank account, and it's important to find a bank that fits your needs and can support you as you grow.Q: Finding if an element belongs to a collection Is there a simple method to tell if an element belongs to a collection, without iterating over it? Something like: if [collection contains element] { ... } A: The collection\_contains? method of Enumerable is what you're looking for: > collection = [] => [] > collection\_contains?(1) => false > collection\_contains?(1.0) => true A collection should be immutable. You could use inclusion? def index\_element(collection, element) collection.inclusion?(element) end collection = [1, 2, 3] index\_element(collection, 3) # => false index\_element(collection, 4) # => true index\_element(collection, 5) # => true Taurine O-sulphate induces apoptosis in human embryonic kidney cells. Taurine O-sulphate (TOS) is a major metabolite of taurine that has the highest concentration in human blood. Recent studies have demonstrated that TOS plays an important role in regulating physiological functions and also functions as a potential therapeutic agent. However, the physiological roles and molecular mechanism of TOS 82157476af
