About This Game

Advent of problematic game!! Shoot Chickens!!

The problem game of Kohei Gallery has been powered up and came back!
Appears much easier to play than previous work!

Easy mouse operation!!

Left click

Shooting!!

Right click

RELOAD!!

You can play intuitively with the mouse!
Left click: Shooting
Right click: Reload

Mouse operation is all !!

Show your

Mouse Skill!!

MISSION which is difficult for the game is prepared!
Let's challenge with the skill of mouse operation!

If you meet the stage's success criteria, you can challenge the next stage!

It is also possible to customize weapons!
 Increasing the number of ammunition and expanding the range of attacks,
 Custom weapons according to the situation!

CRITICAL POINT!!

**QUICKLY SHOOT HERE
 CHANCE OF HIGH SCORE!!**

200,000 OVER!!?

Let's capture the chickens that appear one after another and aim for high score!
 Let's score if you shoot the emerging chicken!
 An important point to get high scores is to shoot through chickens accurately and quickly.

Four kinds of ammunition!
Grasp the characteristics of each and fight advantageously!

Great game, toxic fanbase, spaghetti code. epic gamer game. Running out of decent co-op games to play with friends, saw this for \$5 and decided on it. The puzzles weren't stupidly hard for the sake of being complicated filler (I see it too much lol), but not easy enough to blow through without a challenge. A good middle ground, I'd say. A great choice for a co-op game IMO - it was definitely worth it.

BUT, my only gripes would be the small issues I had:

1. Stuck items - this happened a lot, actually. Objects becoming "stuck" that neither of us could pick up, and sometimes they'd just despawn if colliding with something else
2. Too many movable "trash" items all over the place that just respawned when moved to organize things
3. Stuck hints - we decided on a hint on one level, and it just didn't leave the screen for the rest of that chapter

Definitely not game-breaking and pretty damn mild, especially for a game that was released (I think) just a few days ago. It was still very much enjoyable for both of us.. Interesting game to play with a few friends. HUge number of storylines, give it a shot. Despite its "childish" appearance, this is a decent game. Sadly it suffers from that common pitfall of tower defense, where some turrets are much better than others and you have little reason to use some of them. The laser is a particularly good example of this - unlocked as one of the earliest turrets in the game and almost not used at all in worlds 2 and 3 because of the level layouts. The voice acting is corny, but not terrible. The levels are fairly well thought out but not too difficult. The whole thing feels very refreshing and relaxing in how unpretentious it is.. Terrible controls. Why would you trying to reinvent the wheel? It's so unintuitive that I couldn't play more than an hour.. Old But Gold!

One of the best turn based squad based tactical shooters of all time. can be frustrating when you miss a 90%chance kill but that's also some of the fun. I love how this game is about what people go through and what choices people could make in life, but theres just one thing for the Adult's Technology level: Its too hard. I cannot beat the final (or maybe it isn't a final as I thought after the fourth it would be done) and I was trying to beat it for more than 10 minutes with no success, so could you guys make it easier please?. its only in russian :(I really wish I could recommend this game. As you can probably tell from other reviewers, it is a blatant Limbo rip-off, without any of the ambience, mystery, or atmosphere of Limbo. If this game had come out first, it would have certainly had more of an impact. Not to say that it wasn't an enjoyable, short, somewhat challenging platformer. The graphics are also quite nice, and if you are going to rip off a game visually, you of course could do much worse than ripping off Limbo's visuals. The addition of color is nice, but it doesn't save the visuals from lacking the polish, weight, depth, and subtleties that Limbo has. Animation is also much more stilted than Limbo's, and the hidden areas and switches are in some cases too hidden and you only stumble upon them by just running into the edges of structures haphazardly searching where to go next.

Also for those of you playing on Steam Link with an Xbox controller, I had a number of issues. Occasionally pressing the jump button would trigger two successive jumps in a row which is killer on some of the more precise platforming sections. Also there was no "use" button which made some of the puzzles impossible to complete with this controller, which is ridiculous. I had to go complete the puzzles with my computer mouse in these circumstances. I'm not sure if this is an oversight on the developer's part as I have had a number of issues on various games which say they properly support controllers via Steam Link...and then they don't. I used a PS3 controller attached to my computer and it worked fine, there were no problem's with the "use" button. I haven't attempted hooking up the Xbox controller to my computer though so I'm not sure if this was an issue with the Xbox controller and Steam Link, or the Xbox controller in general for this game. Also this was tested on OSX. Maybe less issues on Windows, I'm not sure.. your controls suck .. Gots to has my 18 wheels

I started Twitter!:

I started Twitter!

<https://twitter.com/KoheiGallery>. **DLC Maid_san's Caving Adventure material collection coming soon!:**

Maid_san's Caving Adventure material collection "Maid_san's Caving Adventure Images" will be released!

Image material used in the maid's cave exploration is recorded.

Once you purchase, you can use it for your own game.

How about trying game creation on this occasion?

* Please use after confirming notes when using.
